The Most Spectacular Displays - Ready To Install

Amazingly Easy Cloudware - Just Log In & Go!

Flexible Sizes, fully built and ready to go including pre-loaded content, software, and communications.
Quality hardware backed by quality people.

Our FLEX LED modules re the same physical size regardless of pitch (resolution). This means when you're ready to upgrade you can simply re-face the display with higher resolution modules without having to replace the entire display.

We also factor in power for most resolutions, allowing the same electrical service to be used in most cases.

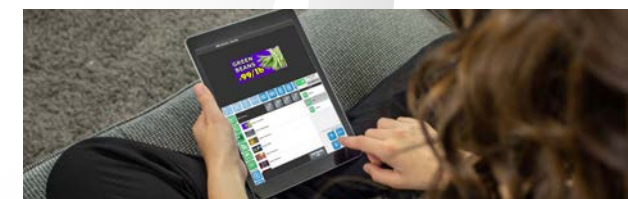

FLEX Modules let us build your desired display within .62 sq feet. Available in 5, 6, 8, 10, 12, 16 and 20mm resolutions.
Full Color available in all resolutions. Grayscale (red or amber) available in 16 and 20mm resolutions.

You can completely control the LED display anytime from anywhere securely from any internet connection device: PC, Mac, iPad App, Tablet, or even your Smart Phone.

1 yr of SM Infinity's Content Creation Service Included.
