- Online Command Portal for Schedule, Media, Sponsorships, Ads and Program Management
- Designated Online Support Staff Assigned for Every Game

# SCOREVISION FAQ

## This looks expensive, why would we want to use this option?

Your getting every dollars worth in features, ease of use, integrations and support. It's not for everyone, but for those that want to bring their program to the next level, this is the answer.

## How can a yearly subscription cost be justified?

This is no different than software licenses organizations pay every year to Microsoft, Google, and others for their products. The benefit is you can recover the costs PLUS MORE money each year using the display and sponsor ads through the system.

## What ways can the cost be recovered for the system?

ScoreVision has built in support for sponsor ads on not only the display itself, but inside of the Fan App where games are promoted and scheduled. They provide support to help organizations get, manage, and program these ads.

## What kind of support is provided with ScoreVision?

ScoreVision provides a full service approach, with training to Admins, Students and Volunteers for the lifetime of the project. Games/events are created and scheduled inside the system allowing their support team to make sure EVERY game has technicians assigned during the duration to assist.

## FEATURE COMPARISON

	<b>LightSpeed (LS)</b> On-Site Content and Scheduling. No Live Video.	<b>LS Live Video</b> Simple Plug-n-Play, Single Input	<b>LS Advanced Live Video</b> Larger productions with multiple inputs and press box control.	<b>ScoreVision</b> Full production, scoring, video, promotion, stats and integration.
